

**MICROBE-LIFT**<sup>®</sup> CCC&D

ALL NATURAL  
BIODEGRADABLE  
NON-TOXIC

NATURAL BACKYARD  
**CHICKEN  
COOP**  
CLEANER & DEODORIZER

**SPECIFIC BENEFITS**

- Eliminates ammonia odors from chicken manure
- Improves conditions for better health
- Accelerates breakdown of litter & waste
- Increases nutrient value of litter for compost
- Effective on all types of chicken waste
- Convenient to apply by simply spraying directly on all surfaces & litter
- Utilizes natural microbes & proprietary odor neutralizers to maintain a cleaner, healthier environment in coops & yards
- Safe for users, poultry & the environment
- Product is readily biodegradable

Chicken manure is very high in nitrogen content, a factor which leads to the emission of high concentrations of ammonia. As a result, toxic concentrations of ammonia can build up in coops. **MICROBE-LIFT/CCC&D** helps to remove the generation of ammonia from waste, improving bird health & reducing maintenance.

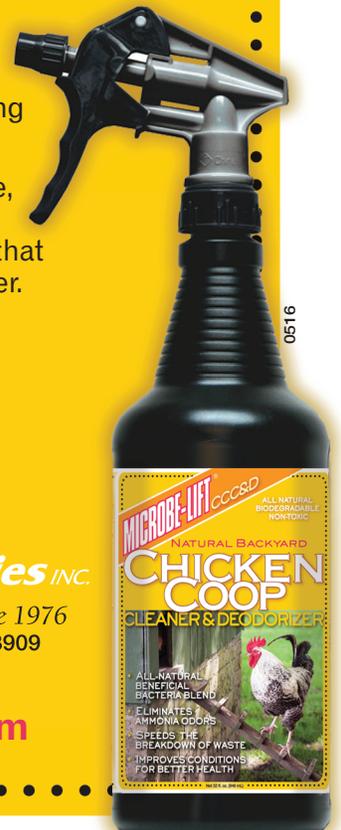

**MICROBE-LIFT/CCC&D** incorporates the action of stable, highly-active microbial cultures specifically selected for rapid uptake of ammonia ions with nontoxic ingredients that capture typical odors associated with chicken waste & litter.

**APPLICATION & DOSAGE**

Simply spray all interior coop surfaces & litter weekly.

**PRODUCT CHARACTERISTICS**

- All-natural beneficial bacteria blend
- Effective temperature range 45°-120°F (5°- 50°C)
